

# OVERVIEW

Sites enter Screening information and confirm eligibility in REDCap

## TREATMENT INITIATION

- Baseline data collected, maternal & fetal health
- Hospitalization recommended but NOT required

## ECHO CORE LAB REVIEW (Quality Control)

- Images uploaded for review of diagnosis as soon as possible but NOT prior to enrolment

## FOLLOW-UP VISITS

- Monitoring as per standard care
- Data collected on CRFs and REDCap for treatment and outcomes
- Images only requested if significant finding
- Continuous assessment of AEs: all symptoms reported and any out of range blood tests
- Home fetal heart rate monitoring offered (RCT)

## OUTCOMES

- Maternal outcome & fetal outcome
- Adverse events assessed to 30 days after birth
